consistently
superior
growth

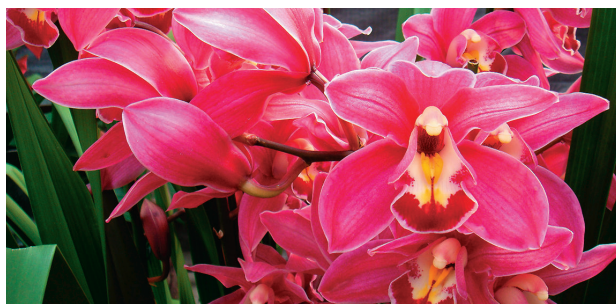

Orchiata

Besgrow Orchiata is a natural, organic product made from *Pinus radiata* bark. The natural properties of this exceptional growing substrate have been proven by orchid growers worldwide to provide true value and consistently superior results.

RENOWNED FOR SUPERIOR QUALITY

Orchiata is a perfect substrate for growing orchids, providing a variety of natural properties to the plant and a wealth of benefits for the grower. During the bark aging process beneficial micro-organisms proliferate and any pathogens are eliminated. The outer surface of the bark chip is broken down, allowing it to hold water and nutrients for the plant, while the inner structure remains hard and stable. Combined with a uniform chip size, with minimal fines and wood, Orchiata gives consistent hydration, an ideal wet/dry cycle and also provides excellent longevity.

Our rigorous quality control ensures that Orchiata will give you superior performance, helping you achieve optimum growth and the very best orchid flowers.

ORCHIATA SAVES YOU TIME & MONEY

Orchiata can be used straight from the bag, its stable EC means there's no need for initial flushing. Orchiata is pH balanced and because it will not break down in the pot it maximises availability of nutrients for the plant. Orchiata's beneficial micro-organisms resist pathogens and promote healthier roots. Growers using Orchiata report a reduced need to repot as well as vigorous growth that shortens maturity time, reducing labour costs while optimising production and plant value.

NATURALLY SUSTAINABLE & RENEWABLE

All Besgrow Orchiata products are produced from sustainable and renewable resources. The finest quality bark is sourced from carefully managed man-made forests in New Zealand, ensuring future sustainability.

CHARACTERISTICS

- 100% natural, organic and renewable resource
- Use straight from the bag
- Aged bark holds water and nutrients on outer surface
- Ideal wet/dry cycle for orchids
- Promotes healthy growth
- Very hard physical structure – will not compost
- Ideal for both hobbyist and commercial growers

TECHNICAL

- Available in 5L/4.5 dry quart and 40L/36 dry quart bags
- pH 5.5 – 6.5
- EC <0.3 mS/cm
- Moisture <15%
- Nitrogen fixed for stable EC
- Uniform chip size
- Versatile for a variety of orchid species

GRADE	SIZE	AFP%	WHC%	WRE%
Precision	3-6mm	43-50	52	25
Classic	6-9mm	47-52	55	25
Power	9-12mm	49-53	56.8	25
Power+	12-18mm	50-54	56.8	25
Super	18-25mm	51-55	56.8	25

AFP Air Filled Porosity
WHC Water Holding Capacity
WRE Water Retention Efficiency
