

Feeding Tools

Exo Terra developed a line of feeding tools to facilitate the feeding of greens, pellets, insects and canned insects. Each tool is designed to ensure maximum hygiene and convenience. They provide comfort to the animals so they can eat in stress free conditions. These feeding tools contribute to a cleaner and healthier terrarium environment.

TURTLE FEEDER

Automatic Feeding Unit

- Programmable automatic feeding unit
- Extra large turtle pellet chamber
- Great vacation feeder
- Fits Exo Terra Turtle Terrariums
- Battery operated (uses 2 AA batteries, not included)
- Accommodates most round and stick pellets

The Exo Terra Turtle Feeder can be programmed to feed up to 4 times per day. Pellet portions and feeding times can be adjusted depending on the size or quantity of turtles. Using an automatic feeding unit reduces the risk of overfeeding and avoids pollution of the terrarium water by left over turtle pellets.

An especially designed turtle pellet chamber with a high holding capacity (200 mL/6.7 fl.oz.) ensures that your turtles can be fed over a significant period of time. The clear cap on the pellet chamber allows close monitoring of the available pellets. The Turtle Feeder can easily be mounted onto the rim of most types of aquariums, including the Exo Terra Turtle Terrarium. When using Exo Terra Aquatic Turtle Pellets the feeder allows you to offer your turtles a complete diet, even during longer periods of absence.
